Summary

Software Developer with 1.5+ years of experience specializing in Java, Spring Boot, and SQL, building scalable backend systems, microservices, and RESTful APIs. Developed and optimized financial systems handling high volume transactions, improving database performance and reducing query latency. Delivered modular backend features, enhancing code quality and reducing debugging and maintenance effort.

Work Experience

Newgen Software

March 2025 - Present

Software Engineer

Noida, Uttar Pradesh

- Engineered **5 loan lifecycle modules** for a scalable **Loan Management System** supporting **Taajeer Finance Bank (Saudi Arabia)** processing **100K+ transactions/day**, automated **batch workflows** and reduced **manual processing effort by 30%**.
- Integrated **10+ REST APIs** with **JWT-based** authentication & authorization for the **BMW Customer Portal (10,000+ users)**; built **React.js** frontend with **React Router & Redux** for secure document uploads & contract workflows submission, reducing API latency by 25%.
- Containerized Spring Boot **microservices** using **Docker** and deployed applications on **AWS** through **CI/CD pipelines**, while implementing unit and integration testing to ensure reliable, maintainable, and production-ready services. Executed a **distributed microservices backend** with **5+ fault tolerant services** using **circuit breaker & retry patterns**, improved **scalability by 40%** and lowered **failure rate by 30%**.
- Optimized backend **microservices** by enhancing **PL/SQL procedures, triggers, cursors**, SQL queries, indexing, and connection pooling, improving response time by **30%**, increasing data accuracy by **30%**, and reducing downtime by **40%** through **performance tuning** and **CI/CD**.

Lenskart

May – July 2024

Software Development Engineer Intern | [Certificate](#)

Gurugram, Haryana

- Enhanced a real-time Remote **Optometry** platform using **React, Node.js, WebRTC, and Redux**, improving diagnostic accuracy by 20% through low-latency streaming and optimized state management.
- Boosted patient engagement by 25% by developing interactive **React Native** application and integrating Redux, delivering a responsive cross-platform user experience.
- Collaborated with **5+** cross functional teams to deliver API integrations and feature releases, ensuring on-time deployment through **CI/CD pipelines**.

Projects

Ziro - Project Management & Collaboration Platform | Spring Boot, Kafka, Redis, PostgreSQL, Next.js, Docker | [Go to Website](#) | [Github](#)

- Implemented a scalable full-stack platform with real-time processing **WebSockets & Kafka**, secured via **JWT & OAuth2 RBAC** for **task creation, assignment, tracking**.
- Created a **microservices backend** with **PostgreSQL, MongoDB, Redis caching**, deployed via **Docker** with **service isolation & horizontal scaling** and built **AI** powered assistants using **RAG, LangChain & Groq Llama-3**, delivering production-ready systems end-to-end.

BosDB – Browser-Based Database with Version Control | Next.js, TypeScript, PostgreSQL, MongoDB, Docker | [Go to Website](#) | [Github](#)

- Strategized a **Git like database version control system** supporting **commits, branches, rollback**, using SQL interception & low latency routing
- Spearheaded the design and implementation of advanced conflict resolution algorithms across multiple database environments PostgreSQL, MySQL, MongoDB, and Redis ensuring 96% data consistency in distributed systems.

Fit Empire | Java, Spring Boot, React Native, Postgres SQL, Typescript | [Go to Website](#) | [Github](#)

- Launched a scalable full stack fitness **membership platform** featuring secure authentication, membership management, class booking, QR-based check-ins, rewards, AI-powered fitness recommendations, and an admin dashboard.

Achievements

Google Developer Student Club

December 2024

- Conducted technical workshops for 100+ students covering Java fundamentals and full-stack application development & architected
- Deployed 6+ independent full-stack projects for self-learning, while contributing to open-source organizations like **Dart** and **FOSSASIA**.
- Solved **500+ problems** on [Leetcode](#) (max rating: **1636**)

Technical Skills

Languages: C++, Java, JavaScript

Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Microservices Architecture, Node.js, REST APIs

Databases: PostgreSQL, MySQL, Microsoft SQL Server (MSSQL), MongoDB, Redis

Tools & Platforms: Git, GitHub, Docker, Kubernetes, Kafka, CI/CD, Maven, Postman, AWS, Google Cloud Platform, Jira

Web Technologies: React.js, Next.js, React Native, SonarQube, Maven, SLF4J, WebSockets

CS Fundamentals: OOPS, DSA, DBMS, System Design, Multi-threading, Concurrency Control, SQL Query Optimization

Education

Zakir Husain College of Engineering & Technology, Aligarh Muslim University

2021 – 2025

Bachelor of Technology (B.Tech)

Aligarh, Uttar Pradesh
